Una rete di calcolatori è costituita da un gruppo di computer interconnessi. Le reti possono essere classificate in base ad una ampia varietà di caratteristiche. Una rete di calcolatori permette ai computer di comunicare tra di loro condividendo fonti e informazioni. La Advanced Research Projects Agency (ARPA) ha progettato l'Advanced Research Projects Agency Network per il Dipartimento di Stato Americano. E' stata la prima rete informatica al mondo, il cui sviluppo è iniziato nel 1969 su un progetto iniziato nei primi anni 60. ● A computer network is a group of interconnected computers. Networks may be classified according to a wide variety of characteristics. A computer network allows computers to communicate with each other by sharing sources and information. The Advanced Research Projects Agency (ARPA) funded the "Advanced Research Projects Agency Network" (ARPANET) for the United States Department. It was the first operational computer network in the world whose development began in 1969 on a project started in the early 60s.
