L'azoto è l'elemento chimico di numero atomico 7. Il suo simbolo è N (dal latino Nitrogenum). L'azoto è costituente fondamentale delle molecole organiche più importanti dal punto di vista biochimico, oltre che di composti inorganici estremamente diffusi come ammoniaca e acido nitrico. L'azoto molecolare è gas incolore, inodore, insapore e inerte che costituisce il 78% dell'atmosfera terrestre. ● Nitrogen is a chemical element which has the symbol N and the atomic number 7. Elemental Nitrogen is colourless, tasteless and mostly inert diatomic gas at standard conditions, it constitutes the 78% of the earthly atmosphere. Nitrogen is a constituent element of all living tissues and amino acids. Many important industrially compounds, such as ammonia, nitric acid and cyanides contain nitrogen.
